FOR PUBLIC SERVICE

Partnership Leadership Seminars

Preparing federal employees to solve day-to-day and national challenges by working collaboratively and leading authentically.

Our *Best Places to Work in the Federal Government*[®] research shows that leadership is the number one driver of organizational performance—yet federal employees consistently indicate that this is where government significantly underperforms.

With a focus on practical application, our Partnership Leadership Seminars develop participants' leadership skills and help federal agencies build the long-term, in-house capacity to innovate, problem solve and achieve results.

Seminar participants:

- Learn how to apply best practices from the public and private sectors
- Participate in interactive class discussions and exercises
- Reinforce lessons by creating a plan to address real-time challenges

“Excellent course! Excellent instructor! Would love for all of my team’s leaders to take this course.”
