

FEDERAL IT LEADERS PROGRAM

In today's fast-paced federal environment, IT professionals need more than technical expertise—they also need strong leadership skills to achieve their agencies' missions. The Partnership for Public Service's IT Leaders Program strengthens leadership and management skills with practical tools and guidance.

Over the course of the 8-month program, participants will learn, connect and collaborate on key challenges facing the IT community. Each session provides participants with direction to immediately incorporate lessons learned into their day-to-day work. Graduates of the program possess an enterprise-wide view of IT management and leave the program better equipped to drive individual and agency performance.

Participants will:

- Develop skills needed to excel in the federal IT management profession
- Engage with subject-matter experts from the public, private and nonprofit sectors
- Participate in interagency team action learning projects to reinforce lessons learned
- Gain access to resources, information and best practices in IT management from agencies across government

The Partnership for Public Service is a nonprofit, nonpartisan organization that strives for a more effective government for the American people. With our focus on innovation in public service, our leadership trainings and seminars are uniquely designed for federal employees.
